## **DETAILED ACTION**

## Allowable Subject Matter

Claims 1-8 and 11-20 are allowed.

Regarding claims 1-8 and 11 –20 there is no prior art of record that teaches: An image display system comprising: an illumination system, comprising: a light source, a color separator which separates an incident light beam according to color, and a scrolling unit, comprising a plurality of spirally-arranged lens cells cell, which converts a rotation of the lens cell into a rectilinear motion of an area of the lens cell through which light passes; a light valve, which processes color beams, into which the light beam emitted from the illumination system is separated and which are scrolled, according to an input image signal, and which forms a color image; a polarization beam splitter, which transmits or reflects incident light beams according to polarization so that a light beam received from the illumination system advances toward the light valve and so that a light beam reflected by the light valve advances toward a projection lens unit; and at least one polarizing element, which is installed on at least one of a path of light traveling from the light source toward the polarization beam splitter and a path of light that is reflected by the light valve and travels toward the projection lens unit via the polarization beam splitter and which transmits only a light beam with a specific polarization. The prior art of record (Dewald) teaches a system with a scrolling unit comprising a single spirally arranged lens cell that scrolls multiple colors. Ouchi discloses a scrolling

Art Unit: 2871

system that uses a spiral reflector thus fails to meet the limitation of light "an area of the lens cell which light passes" thus do not the meet limitations of the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

## Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phu Vu whose telephone number is (571)-272-1562. The examiner can normally be reached on 8AM-5PM M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Nelms can be reached on (571)-272-1787. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
